GNT
SUB
13
12. (New) A radio telephone including a rechargeable power supply and having coupling means for connecting to a charging unit for charging the rechargeable power supply, the radio telephone comprising sensing means associated with the coupling means and operable to sense the absence or the presence of the charging unit being connected to the radio telephone, and inhibiting means configured to be responsive to the sensing means in such a manner that when the sensing means senses absence of the charging unit the inhibiting means automatically inhibits operation of the radio telephone.

SEC 14
13
13. (New) A radio telephone according to claim 12, wherein the sensor and the inhibiting means are operative for a power on mode of the radio telephone.

FR 3
14. (New) A radio telephone according to claim 12, wherein the inhibiting means is adapted to inhibit access to information stored in the radio telephone.

FR 6
15. (New) A radio telephone according to claim 12, wherein the inhibiting mean is adapted to inhibit making an outgoing call from a radio telephone.

5, 6
16. (New) A radio telephone according to claim 12, further comprising a memory means for storing subscriber identity information, wherein the inhibiting means is adapted to inhibit access to subscriber identity information stored in the memory means.
